

Big Button

The **Kadex®** Big Button is a battery-powered alarm device which communicates wirelessly and characterized by its lightweight operation.

The Big Button is designed as a static device and should be mounted to the wall or placed on a table. Its highly sensitive operation makes it very easy to use.

In the event of an alarm, a reassuring indication is given that the alarm has been successfully received and that help is on the way. This reassurance indication consists of a buzzer pattern. The pattern can be set individually.

Software updates and upgrades can be installed remotely (FOTA) from the Kadex Pro Server. The Kadex Pro Server automatically checks the product for correct operation such as; operation, battery voltage and signal strength.
